Yakup Çeri

Backend Developer

Java · Spring Boot · Python · FastAPI · PostgreSQL · REST API · WebSocket

Profile

Graduate of the Computer Programming program at İzmir University of Economics. I build database-driven backend applications with a layered architecture using Java, Spring Boot, Hibernate/JPA and SQL. During my internship I designed a dynamic filtering layer with JPA Specification. I developed my personal project CineVocab on my own, from design to production, with Python/FastAPI and PostgreSQL: it includes authentication, a REST API, real-time WebSocket game rooms, an admin panel and a browser extension submitted to the Chrome Web Store. I am looking for junior backend / software developer positions in İzmir or remote.

Projects

CineVocab · Chrome extension + web application — 2026

github.com/yakupceri/cinevocab-app · live site · Chrome Web Store

- **Scope:** A Chrome extension that translates Prime Video, YouTube and Udemy subtitles word by word and builds a personal word list, plus a web application that turns those words into practice and multiplayer matches. Running in production on Railway.
- **Backend:** Designed a REST API with 12 tables and 60 endpoints on FastAPI and PostgreSQL. Built the authentication layer, including registration, session management and secure password hashing; word lists and progress are stored per user.
- **Real-time:** Developed multiplayer game rooms over WebSocket, with countdowns, instant answer notifications, streak-bonus scoring, a results screen and a leaderboard.
- **Extension:** Built on Chrome Manifest V3 (content script and service worker). Subtitle language detection and a foreign-word filter prevent wrong translations on wrong-language or mixed-language lines.
- **Admin and quality:** Developed an admin panel with user management, action logging and failed-login logging. The interface is available in 6 languages (i18n) with light and dark themes.

Computer Sales System · Spring Boot Backend API

github.com/yakupceri/computer-sales-system-spring-boot

- Developed a **RESTful API** that manages computer sales (products, stock, orders, invoices). Designed a relational model of 10 tables on MySQL (OneToOne, OneToMany, ManyToOne).
- Implemented dynamic filtering with Spring Data JPA **Specification**. Built a layered architecture of Controller, Service, Repository and Domain; used DTOs for data transfer and Lombok for concise code. Tested the endpoints with Postman.

Computer Store · SQL Server database design

github.com/yakupceri/computer-store-sqlserver-db

- Designed a relational database for sales processes on SQL Server and normalized it to **3NF**. Ensured data integrity with PRIMARY/FOREIGN KEY, UNIQUE and CHECK constraints, and transactional integrity (ACID) with transactions.
- Implemented business rules with TRIGGER and FUNCTION, reporting with VIEW, and queried data with INNER, LEFT and RIGHT JOINs.

Experience

Onur Enerji · Backend Developer (Intern) — Jul 2025 – Aug 2025

- Developed database operations with **Spring Boot and Hibernate (JPA)**.
- Designed a **dynamic filtering** layer (JPA Specification) that automatically builds SQL queries from user-supplied criteria.
- Applied a **multi-layered architecture** of Entity, Controller, Repository, Service, DTO and Specification layers.

Eldor Corporation · IT Staff (Intern) — Jan 2025 – Feb 2025

- Ran SQL queries and supported data validation processes.
- Supported the team with basic configuration and connectivity checks of network devices (switch, modem, access point) and with hardware fault diagnosis.

Skills

Backend

Java · Spring Boot · Hibernate / JPA · Python · FastAPI

Databases

PostgreSQL · MySQL · SQL Server

Web

REST API · WebSocket · JavaScript · Chrome Extension (MV3) · HTML / CSS

Tools

Git / GitHub · Postman · Railway

Education

İzmir University of Economics
Vocational School
Computer Programming
(Associate degree)
2023 – 2025 · Graduated

Certificates

Gameathon 4.0 IEU Vocational School, Mentor · 2024

Introduction to Cybersecurity
CISCO · 2023

Languages

Turkish (native)
English (B1)

Clubs

Software Club
Cyber Security Club
Chess Club

Interests

Chess, billiards, football, reading
